**(54) UMBRELLA CONTAINING DEVICE FOR VEHICLE**

(57) Abstract:

**PROBLEM TO BE SOLVED:** To provide an umbrella containing device for a vehicle having no fear of falling off of an umbrella by opening/closing a vehicular door, allowing convenient containing/taking out the umbrella from a vehicular front seat as well as a rear seat, without wetting a cabin nor soiling a floor inside the cabin even when the wet umbrella is contained.

**SOLUTION:** An umbrella containing recessed part opened upward is formed along a vertical direction of a center pillar on an inside cabin side wall of the center pillar situated between a front seat side door and a rear seat side door of a vehicle to communicate/connect a base part of the umbrella containing recessed part with outside of a car body via a communicating passage for constituting the umbrella containing device for vehicle.
